I am new and would really appreciate your help regarding my issue. I am having a hard time getting my dev tools to work, and I would like to fix the issue as soon as possible. I do not have access to a computer with dev tools, and I am using my phone to access the program. I have tried using the "VM" and "Oracle" but that does not seem to work, but I do not have the needed "Dev Tool" to download. Has anyone had any experience with this? I am trying to diagnose my truck in case I need to move it to a garage or something, but this thing is just not working. It is just going into "DIA" mode, but I do not have access to a computer with dev tools, so I don't know if I can make it work for me. I am looking for a cheat seller for PTT 1.12 or how to fix this issue. I really appreciate it.
